➤ Project :

Project : WARE HOUSE (Bombay Dying)

• Description :

In this Project Collaborated with stakeholders to define project objectives and requirements. Our project is **B2B Sales Cloud** Project.we have a client They simplifies their Business that has a **Bed-sheet Business**.

That has a Bed-sheet Business so Fabrication Bed-sheets and all those things. They want to their Business online so they can ease their sales process.

Roles And Responsibilities :

We Have a **Lead Generation** Object which contains **Account ,Contact** and **Opportunity** into a single page so once we enters all the fields converts Account,Contact,Opportunity from a Single Page. So once we enters all the fields it converts Account .Contact, Opportunity from single page.

- Account Stores Company Information which we are dealing with Contact stored .
- Contact Related to particular company and Opportunity that whatever Opportunity they are coming to have with us.
- In Opportunity stages are like **Closed Won ,Closed lost , Lead generated** etc.
- **Approval Process** - if Amount will be greater than \$12000 then it should be ask for Approval process Automatically.
- Once closed date will be populated then Email should shoot to Admin then Opportunity is Closed Won / Closed Lost.
- Opportunity Closed Lost - we stop our Sales Process.
- Opportunity Closed Won - we have start process like our sales process.
- **Lead Management** - Lead are Generated in last 24 hr then Mass Submit data. Leads are generated on community cloud ,websites through data are generated. Another Object which is **Product** - their were Different Different Product of company here.
- We have a list of Records.whatever opportunity demanding on product from our company.

- .we have custom functionality build we add all those Products to particular opportunity.With list of all Quantity demanding from us.They will be shown under Opportunity.
Once the product decided then send the **Quotation PDF** to client that are discuss all those terms.
- Once the Quotation is Fixed and Approved from Particular Client , then we have Another Object **Sales Order**.
Which is whatever order we have to deliver same order to internal team . it's a another PDF which is send to Internal team .so they can fulfilled client needs client orders.
(like whatever products and everything come under that PDF we have to shared to client and Internal team)
They can process their Delivery Partners.
