Marks - 64%,

SUMMARY

Highly focused software developer with **1** year experience in development position. Organized and methodical with an eye for detail resulting in solid coding and trustworthy software programs.

Work Experience

Sep 21 – Present **AppRely Technologies**

- Developing cross platform mobile applications with react native.
- Gathering project requirements by communicating with clients.
- Analysing requirements and communicating with team for integration.
- Coordinating with team for development and testing activities.
- Releasing updates of apps on the respective platforms.

Projects

App for buying and selling used cars

- This is a cross platform mobile app built using **React Native** as a frontend framework and **python django** for backend.
- Have features like **filtering** and **sorting** on various parameters such as **make, model, variant, store, price range, year of manufacturing, features**, etc.
- **Global search** for searching relative variants of the car.
- **Adding car as favourite, tracking search activity of user** by which user can see his past searches.
- This app also has **payment integration** in order to book a car.
- User can also sell his car to the merchant by entering details about his car.

App for football clubs

- This cross-platform app is built using **React Native** for frontend and **python django** for backend.
- This app is built for football clubs and the entities associated with it such as **club owners, trainers, players** and **parents**.
- The main feature of the app is **Live Match**, where all the entities in the club can see the **Live score updates** based on various parameters such as goals, assists, etc.
- Mainly the user can choose between **four roles Club Admin, Trainer, Parent, Fan**. Parents can register **multiple Players** under them.
- Other features of the app are to **schedule match/training events (Club admin)**, **assign tricks to be performed** in the event (**Trainer**), **assign players** for event (**Trainer**), **mark attendance (Trainer/Parent)**, **verify attendance (Trainer)**.
- The Club Admin can **create event, teams, tricks** for his club.
- The app also has a **Tricks section** where players can track their improvement over the time by the Gold and Diamond points, they have earned. Also, player and trainer can **upload their videos** performing the tricks which everyone in the club can see.
